

Ezzy Rappeport

I build AI systems, developer tools, and product software.

ezzyrappeport@gmail.com · Los Angeles / Santa Cruz · ezzyrappeport.com · GitHub / ezzy1630

ABOUT

I build across product interfaces and the systems behind them, with a focus on agent tooling, native software, and verification. Based in California and open to software and AI opportunities.

SELECTED WORK

Downright Independent Developer · 2026

Markdown, treated like a Mac document.

A native editor and reader for the files you already own. Exact source, thoughtful typography, and Finder previews.

MonkeyClaw Lead Engineer & Contributor · 2026

Tests agent sandboxes, reproduces failures, and checks that defenses leave evidence.

A working CLI and seeded demo, with eight verification gates across the security loop.

FlowE Founder & CEO · 2026

Coursework, calendars, and focus in one iOS app. Start with a brain dump; leave with a plan for today.

A native SwiftUI build with Canvas sync, real-time tasks, and offline retry.

Etch Founder & Engineer · 2026

AI-assisted hardware design where generated RTL earns its way through verification.

A saved FIFO design run with simulation, bounded-formal checks, and a proof dossier. Physical signoff pending.

Argyph Creator & Engineer · 2026

Useful codebase context for coding agents, through one local MCP server. No cloud account required.

A released Rust CLI with 19 tools, distributed through npm, crates.io, and Homebrew.

TOOLS & PRACTICE

TypeScript / React / Next.js / Rust / Python / Swift / SwiftUI / Agent systems / Verification & evals /
WebGL / GLSL
